

As a resident of the Chicago area KLOVE provides me the opportunity to obtain news from a Christian point of view without getting a fanatical twist. This enables me to stay informed on events and to contrast the information with other view points available such as the TV news and make better informed decisions.

In addition the music is very inspirational and surprisingly timely as I encounter life's daily struggles. As a national broadcaster it provides me information from several parts of the US and a variety of perspectives about Christian music.

There is not another station that provides the quality of inspirational music, and national perspective available on KLOVE. Chicago is a large area. I live 50 miles from where I work. Being able to listen to KLOVE at home, on the road and in the office are a key part of my ability to cope with life, and key to my personal religious practice. Since it is listener supported the community is ready willing and is supporting this station. A giant void would be present if it were displaced, that no other station I have ever come across would be able to fill. Lives are changed by this station. People discover more about themselves and their relationship with GOD.

Please keep KLOVE in place and with it's current power.  
Thank you,

Randy Kelley
